ILTA Grain Inc.-Saskatoon, Saskatchewan

ILTA is pleased to announce the commencement of shipments from it's new Saskatoon processing facility on the West side of Saskatoon (Rm of Corman Park) adjacent to CN mainline rail. The new facility is the largest most modern pulse and specialty grain processing facility in Western Canada. Initial shipments are starting with containerized product as construction proceeds on the remainder of the facility. The facility which has a loop track off of CN mainline rail is capable of loading 115 railcars in 24 hours and is the largest facility dedicated to specialty grains and pulses. State of the art handling, processing and bagging equipment will be used to ensure the highest quality product is shipped from the facility.

Construction on the facility continues and will be complete in March 2016.
